Environmental Policy

STATEMENT OF INTENT

Burgess is involved in high-quality commissioning management, validation activities and commissioning and has the vision to be synonymous with professionalism and innovation with faultless and safe project delivery in every operational area. The company is not involved in manufacturing or construction activities.

The Directors recognise that the organisation's day to day operations can, directly and indirectly, impact the environment. We aim to protect and improve the environment through proper management and to adopt best practices whenever possible. We will work to integrate environmental considerations into our business decisions and adopt greener alternatives wherever possible throughout our operations.

To meet the above objectives, we will:

- Bring this Environmental Policy Statement to the attention of all stakeholders
- Comply fully with all relevant legal requirements, codes of practice and regulations at international, national and local levels
- Understand our compliance obligations and how we fulfil these
- Identify and manage environmental risks and opportunities arising from our work activities
- Provide adequate resources to control environmental risks arising from our work activities
- Improve the environmental efficiency of our travel by, where practicable, reducing travel distances to work by selecting staff closest to the location
- Minimise waste arising from our work activities and increase recycling where possible
- Only engage contractors who can demonstrate due regard for the environment
- Prevent pollution to land, air and water

The Environmental Policy will be reviewed at least annually and revised as necessary to reflect changes to the business activities and any changes to legislation. Any changes to the policy will be brought to the attention of all stakeholders.

Graham Creed
Managing Director
Director Responsible for Environmental Management
